JANET AND TONY

Caramel colored in
winter
honey colored in
summer
raven curly locks
slender and tall
she stood
a shadow of herself
weakened spirit
flightless bird
willingly she gave up
the ghost
his love alone was not
enough
"I thank God for Tony
everyday but
sometimes you know
you want your mother
to hold your head and
tell you everything is
going to be alright."
She wanted to hear her
mother say

I love you
no more fights
these words remain
unspoken
the only reply were
broken promises
his love alone was not
enough
She entered into her
spiritual life
renewed
free
unscarred
thrown away daughter
fatherless child
now in her Father's
arms
with wings she waits
patiently seated on a
cloud
a caramel colored angel
raven curly locks
slender and tall
one day to be rejoined
with her true love
where his love alone
will be enough

Dean's Message to the Class of 1997

My congratulations to all members of the UMDNJ-School of Osteopathic Medicine Class of 1997. As have the classes before you, the class of '97 has continued the tradition of outstanding accomplishments that places you among the elite of the graduating osteopathic medical students from across the country. We are very proud of each and every one of you. We also welcome you to our alumni association and trust that you will always consider yourself part of our ever growing family.

We look forward to the 21st Century as an exciting and challenging time for young new physicians. You have learned treatment and prevention modalities unknown to man just a short time ago. As a result of your four years in medical school, you have the skills to carry out the work of the most noble of professions. But medicine, with its daily discoveries, is ever changing. The challenges of conquering such problems as cancer, AIDS, and impairments associated with aging, to name a few, remain before you. Although new technology allows you to practice medicine as never before, always remember that the physician's role is to enrich the quality of life for patients so that life is worth living. By the same token, while exotic drugs make miracles seem commonplace today, remember always that no drug can replace the empathy and healing hands of a well trained, attentive and dedicated physician.

As you enter practice, you will appreciate that you are unique. You are more comprehensively trained by virtue of being osteopathic physicians than any other health care provider. You have the knowledge and skills to pursue the choices you want in the future while being steeped in the long and proud tradition of a century of osteopathic care giving skills. The work is hard; the rewards great. Our best wishes to you and yours always for health, happiness and success.

go in lots of small child drownings occur in back yard swimming pools, usually located at the young home. Most of the time, the adult caretakers (no truth in infidelity) are leaving the toddler has wandered near the pool or even entered the water. Anytime a child is near a pool, about 80% of such drownings can be prevented by using a fence with latches to protect children from wandering into the swimming pool area. Many communities and local installation of these fences if you have a pool. The National Center for Child Abuse and Neglect is currently working on a study to determine if a fence with latches is a better way to prevent child drownings. If you have a pool, you should consider installing a fence with latches. If you have a pool, you should consider installing a fence with latches. If you have a pool, you should consider installing a fence with latches.

baby Berman's first words

Adolescent and adult drownings occur in different circumstances and alcohol is a risk factor in many of these drownings. Most adult drownings occur in association with a drink or two. If you are drinking, you should not swim. If you are drinking, you should not swim. If you are drinking, you should not swim.

General Anesthetics

"It is better to aim high and miss than to aim low and hit"
- Author Unknown (from a men's bathroom inscription)

A) INTRODUCTION: Ideal general anesthesia is considered to be the loss of consciousness, amnesia, analgesia, plus the loss of sensory and autonomic reflexes and skeletal muscles.

Understand that the anesthetic drugs available today meet all the requirements.

Historically, anesthetics "induced unconsciousness during surgical operations."

anesthesia took place in the "old days".

To laugh often and much;
To win the respect of intelligent people
and the affection of children;
To earn the appreciation of honest criticism
and endure the betrayal of false friends;
To appreciate beauty;
To find the best in others;
To leave the world a bit better,
whether by a healthy child,
a garden patch,
or a redeemed social condition;
To know that even one life has breathed easier
because you have lived;
This is to have succeeded.

I asked God for strength, that I might achieve....
I was made weak, that I might learn humbly to obey.
I asked for health, that I might do greater things....
I was given infirmity, that I might do better things.
I asked for all things, that I might enjoy life....
I was given life, that I might enjoy all things.
I got nothing that I asked for, but everything I had hoped for.
Almost despite myself, my unspoken prayers were answered.
I am, among all men, most richly blessed.

Richard H. Nussey Jr., D.O.

Life isn't a destination, it's a journey. We all come upon unexpected curves and turning points, mountain tops, and valleys. Everything that happens to us shapes who we are becoming, and in the adventure of each day, we discover the best in ourselves.

I would like to thank -
Tina and Karen, without whom, I never would have made it,
my grandparents, for their prayers,
my brother, for always keeping me humble,
my dad, who taught me to believe in myself,
and my mom, who showed me, by her example, to never give up.

To laugh often and much;
 To win the respect of intelligent people
 and the affection of children;
 To earn the appreciation of honest criticism
 and endure the betrayal of false friends;
 To appreciate beauty;
 To find the best in others;
 To leave the world a bit better,

whether by a healthy child,
 a garden patch,
 or a redeemed social condition;
 To know that even one life has breathed easier
 because you have lived;

This is to have succeeded.

Just ask politically correct administrator Dean Micciche. Talk to towering Herff-Jones publishing reps Todd Oswald and Laura-Jean Beierschmitt. Consult with noted photography guru Jack Mulgrew and busy graphic artist Veronica Coia. Their time and talents are much appreciated. And when they have trouble remembering the Class of 1997, they choose Articulations®. Now with pyramids, new and improved Articulations will get your memory movin' in no time™. Quickly and without side effects the Class of 1997 will return in a flood of sound and images. So the next time dementia sets in, reach for Articulations. And be sure to ask for it by name.

Osteopathic Oath

I do hereby affirm my loyalty to the profession I am about to enter.

I will be mindful always of my great responsibility to preserve the health and life of my patients, to retain their confidence and respect both as a physician and a friend who will guard their secrets with scrupulous honor and fidelity, to perform faithfully my professional duties, to employ only those recognized methods of treatment consistent with good judgement and with my skills and ability, keeping in mind always nature's laws and the body's inherent capacity for recovery.

I will be ever vigilant in aiding the general welfare of the community, sustaining its laws and institutions, not engaging in those practices which will in any way bring shame or discredit upon myself or my profession. I will give no drugs for deadly purposes to any person, though it be asked of me.

I will endeavor to work in accord with my colleagues in a spirit of progressive cooperation, and never by word or by act cast imputations upon them or their rightful practices.

I will look with respect and esteem upon all those who have taught me my art. To my college I will be loyal and strive always for its best interests and for the interests of the students who will come after me. I will be ever alert to further the application of basic biologic truths to the healing arts and to develop the principles of osteopathy which were first enunciated by Andrew Taylor Still.

In the presence of this gathering I bind myself to my oath.
